2014 Pricing on 12 Items Formerly Dual-Managed by GSA and DLA

In recent years, a small number of products often used by agencies engaged in Wildland Firefighting have been dual-managed by both GSA and DLA. Instead of one agency managing the entire supply chain and setting a single price for the entire government, both agencies managed their own contracts and set their own prices for these items. Since the transition of the Wildland Fire program to DLA on May 1, 2014 these items are now managed solely by DLA.

The table below indicates the relevant National Stock Numbers (NSN), product and 2014 pricing via DLA. These prices apply to all customers, federal, state or local, for the 2014 fire season. The prices for these 12 items listed in GSA's 2014 price update (published in March 2014) are no longer valid.
